RM Integris
Newsletter September 2019

Mark House and Kim Wiles from the RM Integris Product Management Team

Back to School – the busiest and most exciting time of the school year. New students in new (usually too big) uniforms eagerly anticipating the term ahead, greeted by school staff not yet completely exhausted! Here at RM, we are also sharing that sense of newness, having recently moved into a new office space.

It's just over the road from our old building, but on the inside has been kitted out for a new 'agile' world. We are finding our way a bit, but things are already having a positive impact on RM Integris product development – hopefully you will see this reflected in this edition of the Newsletter. Make sure you are keeping up with all the latest developments and news though the Communication Hub on the RM Integris Help Pages.

Welcome to RM Integris

Autumn 2019 RM Integris Meetups are back!

RM Integris Meetups Autumn 2019
Book your free ticket to the RM Integris Meetups this autumn, being held in 19 locations across the UK

We see our RM Integris users as part of a whole school community, which is why we have created the RM Integris Meetup events. You'll meet like-minded people facing the same challenges as you, you'll hear about tried and tested solutions to help your team embed and use RM Integris like never before and be the first to find out about our new developments.

This autumn we have over 20 half-day events – right across the country – and last year we saw over 1,500 delegates attend, giving us an average feedback score of 90%. They are completely free, but sell out quickly, so we urge you to find the nearest location to you and book now!

What's new in RM Integris?

helloData

The Integris team are excited to reveal our new partnership with helloData, a data analysis interface designed to track and report on pupil data at individual, group, whole school and MAT level, whatever the assessment framework. The helloData interface has been developed by a dedicated team of school professionals over a number of years. Using the interface is incredibly simple – the data can be cut, chopped and analysed in countless different ways.

Whether you wish to see attainment, progress or attendance, helloData allows you to see it all with just a couple of clicks of a button. RM Integris customers will be provided with 54 Assessment plans into the Assessment module area, which is what is used to populate the helloData Interface. These are also flexible to suit the requirement of any school or Assessment plan required.

For more information on **helloData** contact **admin@hello-data.co.uk**.

RM Training Academy

We are really pleased to announce the imminent release of our new Training Academy – a free, personalised, on-demand learning environment available to all RM Integris users.

RM Training Academy is an online training portal that gives you access to a wealth of learning materials that will help you and your staff to become confident users of Integris.

Courses cover many of the core elements of the Integris system and each course consists of bite-size videos that explains and demonstrates the why and how respectively for each area of learning.

To help anybody using the Academy quickly find the courses relevant to them, we have grouped courses together to create learning paths for different roles, such as SLT, teachers and administrators.
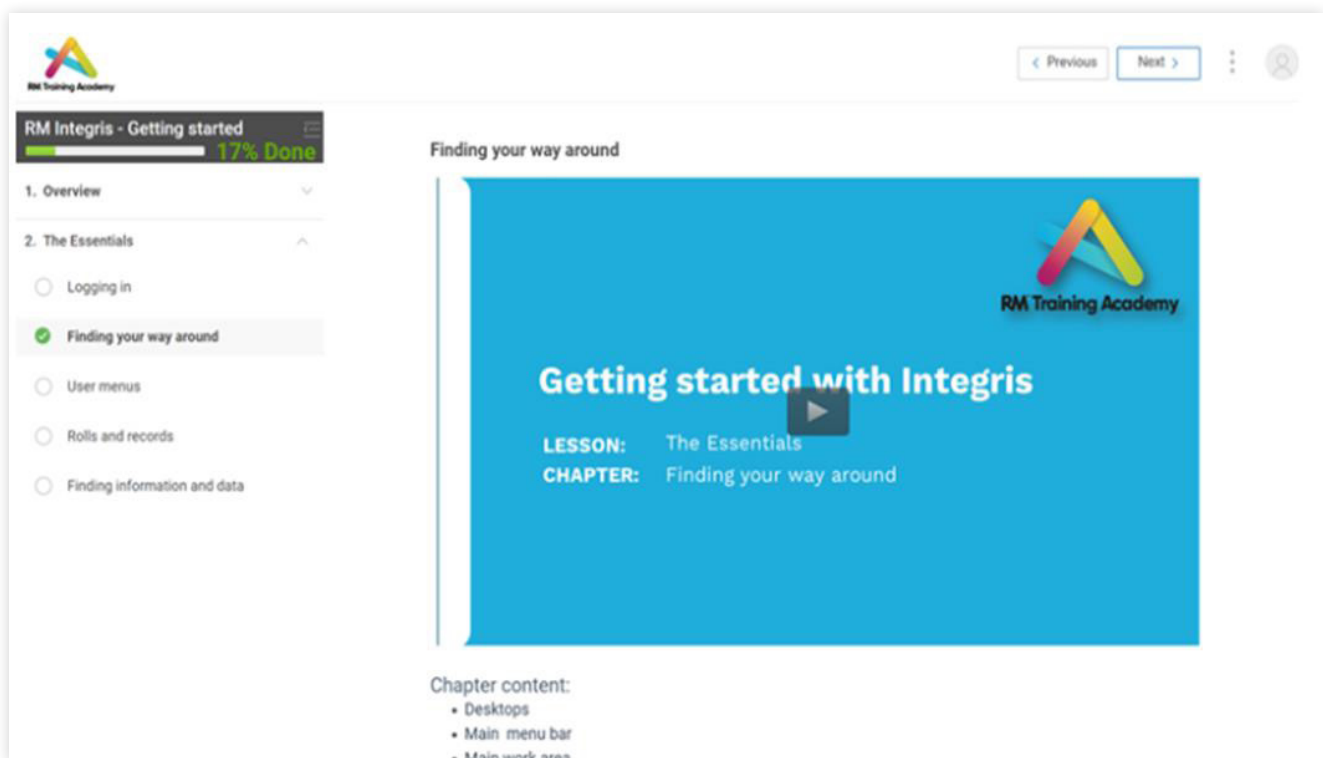

The Training Academy will also keep a record of progress for each individual, so you don't have to do all your learning in one chunk. You can resume a course from where you left it and navigate your way around to do things in a different order if you need to understand a particular element at a specific time.

We hope this will help everyone to feel more confident in using Integris and have a better understanding of all the ways it can support you all.

Courses will continue to be added to the academy, both for RM Integris and for other applications and solutions, so watch out for announcements about how the Training Academy library is developing.

The RM Training Academy will be made generally available in Autumn term, we are currently seeking early adopters through our Pathfinders programme. If this is something you are interested in, please see https://www.rm.com/blog/categories/pathfinders for more details.

More Details

Watch our Brand-New Case Study with The Odyssey Collaborative Trust

RM Integris is a school MIS that's easy to install, easy to use and works across all schools in Odyssey Academy Trust.

The Odyssey Collaborative Trust is made up of 5 primary schools and 1 junior school, with approximately 2300 pupils in total. In this video Adey Greaves, Business Manager at Portway Junior School and Chief Operations Office for the Trust, describes his experience of working with RM Integris, describing it as 'one of the easiest MIS systems that I've ever had any dealings with'.

RM Parent Portal

Parent Portal

Simple, safe and secure parent communication is a key requirement and is highlighted as a key building block for successful schools by Ofsted in its new 2019 Inspection Framework. RM Integris has always provided a number of popular parent communication tools and we are pleased to announce a further enhancement.

RM Parent Portal is the new, easy to access parental communication tool that works in conjunction with RM Integris providing access to key pupil information anywhere, anytime on computers, tablets and mobile phones. Parents and Guardians can access real time information about their children at school including attendance, behaviour , timetable and reports.

The RM Parent Portal will be made generally available in the Autumn term and will be highlighted in the upcoming Meetups (https://www.rm.com/products/rm integris/meetups). We are also currently seeking early adopters through our Pathfinders programme , please check out https://www.rm.com/blog/categories/pathfinders for more details.
